

AMENDMENTS TO THE CLAIMS

Claims 1-8 (Cancelled)

9. (Currently Amended) ~~The mobile communication terminal of Claim 1,~~
A mobile communication terminal that is served in a mobile communication
network and performs wireless communications, comprising:
a housing having a slot;
a memory in the housing configured to store a plurality of data sets,
wherein each data set is associated with a card;
a user interface coupled to the memory and configured to prompt a user to
select a data set from the plurality of data sets; and
an output interface coupled to and configured to read and output from said
memory said selected data;
wherein said output interface comprises:
a recording medium that is readable by an external device, wherein
said recording medium is permanently coupled to said slot and movable
between retracted and protruding positions; and
a writer configured to write said selected data set to said recording
medium, wherein said writer, when the recording medium protruded out of
said mobile communication terminal is retracted inside said mobile
communication terminal, deletes said selected data set written in said
recording medium.

10. (Currently Amended) The mobile communication terminal of Claim 4-9, wherein said output interface comprises a code displaying device for displaying code that corresponds to said selected data set, the code being optically readable.

Claims 11-12 (Cancelled)

13. (Currently Amended) The mobile communication terminal of Claim 4-9, wherein said mobile communication terminal is a mobile telephone for performing wireless telephone communications.

Claim 14 (Cancelled)

15. (Currently Amended) The mobile communication terminal of Claim 4-9, wherein said selected one set of information is written upon said recording medium while said recording medium is in the retracted position, and wherein said selected one set of information remains written upon said recording medium while said recording medium is in the protruded position.

Claims 16-18 (Cancelled)

19. (New) The mobile communication terminal of Claim 9, wherein each of said data sets includes information required for electronic-commerce transactions.

20. (New) The mobile communication terminal of Claim 19, wherein said information required for electronic-commerce transactions includes credit card information.

21. (New) The mobile communication terminal of Claim 9, wherein said each of said data sets includes information for identifying a user.

22. (New) The mobile communication terminal of Claim 9, wherein said recording medium is a card-shaped recording medium that can be read by a card reading device.

23. (New) The mobile communication terminal of Claim 9, wherein said recording medium moves between said retracted and protruding positions in response to a predetermined operation on said mobile communication terminal.

24. (New) The mobile communication terminal of Claim 22, wherein said selected one set of information is written upon said recording medium while said recording medium is in the retracted position, and wherein said selected one set of information remains written upon said recording medium while said recording medium is in the protruded position.
